Niall O' Connor

Since the first time I began to code I loved every moment of it. I really enjoy seeing an idea go from nothing to something that I can be proud of. For the past 4 years I have been working on many projects using multiple languages, libraries, and frameworks. From simpler projects such as redux push notifications to more complex ones such as blockchains, java games, and socket.io applications.

EMPLOYMENT

2017 (Feb) - present

SOFTWARE DEVELOPER – Powwownow
+ ReactJs
+ NodeJs
+ MySQL
+ Php
+ jQuery
+ Redux
+ Sass

ATTRIBUTES
